### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior art of record and the declaration and arguments filed to so perform a method of preparing a graphite article as claimed in claims 1 and 15, including mixing a particulate fraction comprising at least about 35 weight percent coke, coal or mixtures having a diameter such that a major fraction passes through a 2 mm mesh screen but not a 0.25 mm mesh screen, a pitch binder and carbon fibers to form a stock blend, wherein the fibers are added after at least about 50% of the mix cycle is completed to produce a graphite article having increased strength and decreased brittleness; further including upto 65% of a filler comprising at least 75% calcined coke having a diameter such that at least 70% will pass through a 200 Tyler mesh screen and a pitch binder to form a stock blend.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Note that the affidavit filed on 29 November 2004 further deems that it is novel and unobvious over the prior art of record to use the claimed calcined coke material in the claimed method for manufacturing a graphite article having the superior property of reduced brittleness.
